**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by SAGE (US #5,957,895).

*Please* Regarding claims 1,6, and 7 Sage teaches an infusion device comprising a fluid reservoir (50) having at least one flexible wall (102 or 104), a needle (external tip portion of 54), a Belleville spring (102 or 104), and a pin (internal end portion of 54).

Regarding claims 2 and 8, there is a tactile indication that the pin is disengaged from the central aperture of the Belleville spring.

Regarding claims 3-5 and 9-11, disengagement occurs automatically when the user operates a push button (42), and includes removing a guard or interlock (52)

***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. SAGE (US #6,074,369).
